Green Lawnger® TR

A natural dark green turf colourant to improve seasonal growth transitions

- Promotes early spring growth/green-up of cool season grasses
- Can elevate the sward temperature in early-Spring and late-Autumn, and so may help extend the playing season
- Accelerates spring thaw of snow and ice-covered turf grasses

Supplied by:
BASF Ireland DAC, 4th and 5th Floors, 2 Stockport Exchange,

General Information:

Green Lawnger® TR is a concentrated dark green turf colourant which contains ColorLock™ technology, which provides resistance to undesirable colour shifts under normal UV light exposure.

Green Lawnger® TR reduces UV-A and UV-B light transmission by 50%-70%, protecting turf against harmful UV radiation.

For use on golf courses. Do not use on athletic field (e.g., football or rugby fields) and residential lawns, due to a high colour transfer potential.

Application:

Apply according to the table details below.

Application	Rate / Ha	Water Volume / Ha
Late autumn to early winter	Up to 5L	300L
Late winter to early spring*	Up to 2.5L	300L

*A second application may be made 5-7 days later if packed snow or ice covering is especially deep and accelerated thawing is not initiated.

For best results, use a low to medium spray pressure and apply in two directions perpendicular to one another; two or more light sprays provide a better coverage and appearance than one heavy spray. Avoid overspray on any area where colour is not desired, otherwise permanent staining may occur. Accidental overspray may be removed by water prior to drying.

For the most uniform coverage, apply Green Lawnger® TR with flat fan spray nozzles.

ALWAYS FOLLOW PESTICIDE MANUFACTURER'S LABEL DIRECTIONS.

- Fill the sprayer tank 1/2 to 2/3 the total volume of water and begin agitation.
- Green Lawnger® TR colourant should be added into the mix solution following the standard order of addition – after dry flowable / dispersible granules and before water-soluble pesticide formulations.
- Allow Green Lawnger® TR colourant to fully disperse into the mix solution before adding additional soluble pesticides.
- Fill remainder of the sprayer tank to the desired volume with water.
- Apply pesticide solution to target site at the label rate specified by the manufacturer.

Equipment Cleaning:

- After pesticide applications, always drain and clean the sprayer tank, pump, hoses, valves, and nozzles as per the label instructions of the pesticide manufacturer.

After initial rinsing, the use of a spray tank cleaner will facilitate further removal of pesticide residue from spray equipment.

Do not leave pesticide mix solutions with Green Lawnger® TR colourant in the sprayer tank overnight.

STORAGE AND DISPOSAL:

KEEP THE PRODUCT FROM FREEZING. Do not re-use empty containers. Safety goggles are recommended when handling the concentrate. If product is spilled, contain and absorb with inert material. Dispose of in accordance with local directions.

CAUTION:

Keep out of reach of children. If inhaled, move to fresh air and seek medical attention. In case of eye contact, flush with running water for 15 minutes and seek medical attention. On skin contact, wash thoroughly with soap and water. In case of ingestion, rinse mouth and drink plenty of water. Do not re-use this container. Rinse contents into the spray tank and crush prior to disposal. Waste must be disposed of or incinerated in accordance with local regulations. Safety data sheet available on request.

PRECAUTIONARY STATEMENTS:

If medical advice is needed, have product container or label at hand.

Keep out of reach of children.

Read label before use.

May produce an allergic reaction. Contains: 1,2-BENZISOTHIAZOL-3(2H)-ONE

WARRANTY DISCLAIMER:

BASF plc warrants that this product conforms to the description on the label and is reasonably fit for the purpose stated on the label when used in strict accordance with the directions.

BASF PLC DISCLAIMS ALL OTHER WARRANTIES, EITHER EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

REMEDIES:

The remedy for injury or damage from this product is limited to, in BASF plc sole discretion, replacement of the product or refund of the purchase price paid. UNDER NO CIRCUMSTANCES SHALL BASF PLC BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES.

LIMITATION OF LIABILITY:

No one is authorized to change or supplement, either verbally or in writing, the statements contained on the label. BASF plc and the seller are not liable for personal injury or property damage or loss, including crop damage or lack of performance, due to circumstances beyond their control, like a product user's failure to comply with the directions. Buyer and user assume all risks for these events.
