

# Roguard® Ratbox xtra

**Robust bait box for indoor  
and outdoor use**

® = Registered trademark of BASF

- Always refer to the DIRECTIONS FOR USE as stated on the bait packaging
- Always lock the ratbox xtra and place along rat runs (eg. against buildings, fences or hedges) and between nesting and feeding sites but always in places which are inaccessible to other animals and birds. Where necessary, secure in place with rocks, bricks or other heavy objects.

**How to use:**

The ROGUARD RATBOX Xtra contains a pair of steel bait block holders that can be fixed horizontally, or, by detaching the plastic hangers, can be fitted vertically. These items are not needed when using loose bait. They are only required if you want to securely fix bait.
